

UNICEF registration workbook — Mamta Sonwalkar track

Status: Draft — internal only (not served on the public demo site).

Purpose: Single place to collect answers, narratives, and evidence for UNICEF-related registration or programme submissions **without tying them to runnable product code**. Update dates and facts as commitments become real.

1. Identity & coordination

Field	Notes
Primary contact	Mamta Sonwalkar
Role / title	(e.g. product lead, technical lead)
Email	
Phone / Signal / etc.	
Organisation	(legal entity submitting or backing the work — e.g. intellADAPT / Edwise Tech as applicable)
Co-applicants / partners	(ministry adjacency, UNICEF CO, NGOs — list)
Time zone	

2. Programme / vehicle

Which UNICEF mechanism is this aimed at? (tick one primary; duplicate section if parallel tracks)

- ☐ UNICEF Venture Fund (or successor innovation window)
- ☐ Country office innovation / partnership pathway
- ☐ Other: _____

Target round / intake / deadline:

- Reference link (official):
- Hard deadline date:

Internal owner for submission: Mamta Sonwalkar (+ named backup):

3. Problem & geography (truthful baseline)

Describe the **public-health / climate–health coordination** problem in **Nepal Bagmati** (or revised geography) **as you would defend it to an evaluator** — aspirations vs what is validated today:

- Population / geography in scope:
- Existing data pipelines (DHIS2, AQ, meteorology — what is actually connected vs planned):
- What the **current demo proves** vs what requires a governed pilot:

4. Solution summary (architecture in words — no code)

One paragraph describing the prototype: APIs, synthetic vs real data, optional verification hooks, optional blockchain anchoring philosophy, dashboards.

Attach or cross-reference diagrams from the repo **as figures** only (do not imply code = validation):

- docs/tech/early_warning_platform_architecture.svg
 - docs/tech/fastapi_mongodb_render_architecture.svg
 - docs/tech/simple_frontend_architecture.svg
-

5. Open source, blockchain, AI — claims you can evidence

Use **only** statements you can back with repository, deployment, or written methodology.

Pillar	Honest current state	Evidence to attach / link
Open source	MIT / GitHub URL / license file	
Blockchain	Cryptographic verification vs optional on-chain txs; testnet vs mainnet	
AI	Which models run in production; validation status (or “not yet validated on partner data”)	

Red lines: Do not copy aspirational numbers from internal strategy packs into official forms unless approved and measured.

6. Data, privacy & child rights

- Personal data handled today: (*yes / no — what classes*)
 - Data residency / UNICEF DPIA alignment: (*status*)
 - UNICEF GIS / safeguarding expectations: (*checklist*)
 - linkage to external **Privacy / Terms** stubs if appropriate for web demo only
-

7. Deployment & sustainability

Topic	Answer
Current hosting sketch (e.g. Render + Mongo Atlas)	
Estimated run cost band	
Hand-off / open-source stewardship after funding	
Local capacity (Nepal) for operations	

8. Budget & milestones (high level)

- Phase 1 (months): outcomes + budget band:
 - Phase 2:
 - Key risks & mitigations:
-

9. Mandatory attachments checklist

Use the **official UNICEF checklist** for your vehicle; map files here:

- ☐ Executive summary
- ☐ Technical annex (diagrams OK, no inflated metrics)
- ☐ Letters of intent / partnership (if required)
- ☐ Ethics / data use (template or CO sign-off if required)
- ☐ Team CVs
- ☐ Pitch / video (spec from call)

File naming convention: keep UNICEF_reg_mamta materials in docs-private/ or a sibling folder that is **not** web-mounted.

10. Version log

Version	Date	Author	Changes
0.1	(fill)	Mamta Sonwalkar	Initial workbook

11. Cross-reference

- Detailed strategy checklist (internal): UNICEF_REQUIREMENTS_STRATEGY.md in this folder — **do not** paste unreviewed wording into registrations without aligning to evidence.
